

# Polylok Safety Screens

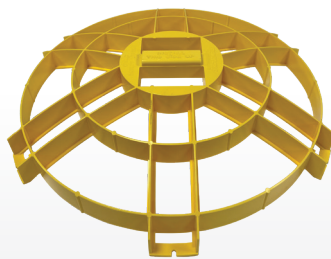

Polylok offers a range of safety screens to add a secondary layer of security to tank access holes. Unfortunately, access covers can become damaged, dislodged or even misplaced leaving the opening exposed and dangerous for children and pets. The Polylok range of safety screens is a low cost solution that helps prevent accidental tank entry. These safety screens easily slot into the Polylok range of risers or can be added to 600mm concrete, corrugated or ribbed pipes using the Universal Safety Screen with Retainer Ring. They can be installed in minutes and give instant peace of mind.

Available in four sizes

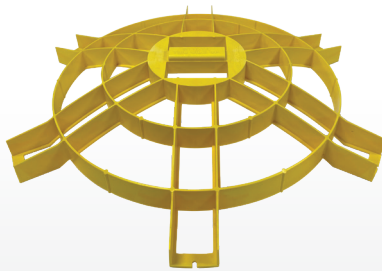

For 300mm (12")  
Polylok Risers

Part no: 3017-SS

For 500mm (20")  
Polylok Risers

Part no: 3009-SS
