

Distribution Boxes

Robust, easy to install drainage solutions for all domestic/light commercial applications

Polylok's range of distribution boxes (a.k.a. inspection or sample chambers) are quick to install, robust and secure and easy to access. They range from simple 4 hole distribution boxes to the large 'Rhino' 10 hole box. All boxes are made from robust polypropylene (that will never rust) and are supplied with seals, and lockable green (pedestrian rated) covers to blend into landscaped environments. If you need extra height, no problem, all boxes will take the Polylok range of risers.
