

UV Effluent Filters

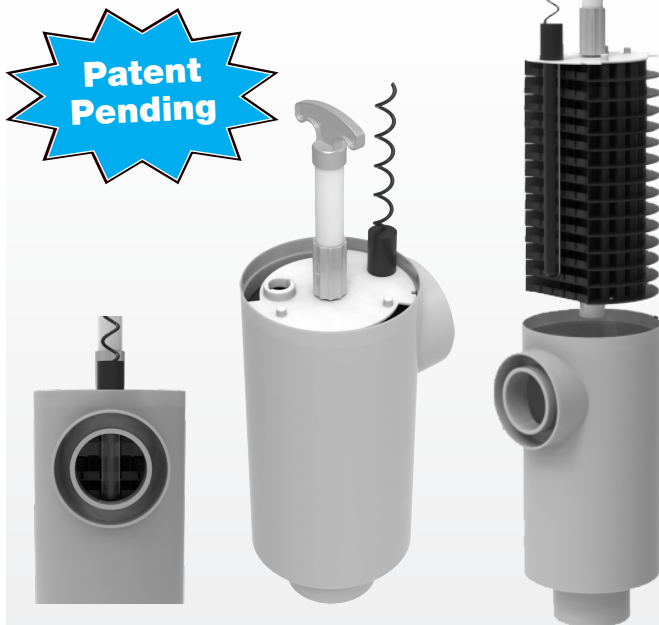

Polylok offers UV Filtration solutions to disinfect your wastewater for release to the environment

Ultra Violet technology has been around for quite a while in household water disinfection. It is now gaining traction in domestic wastewater treatment where the protection of household wells and the environment become more of a priority. We have used our many years in product design and combined it with the latest UV technology to offer powerful disinfection and filtration solutions.

Compact UV Filter

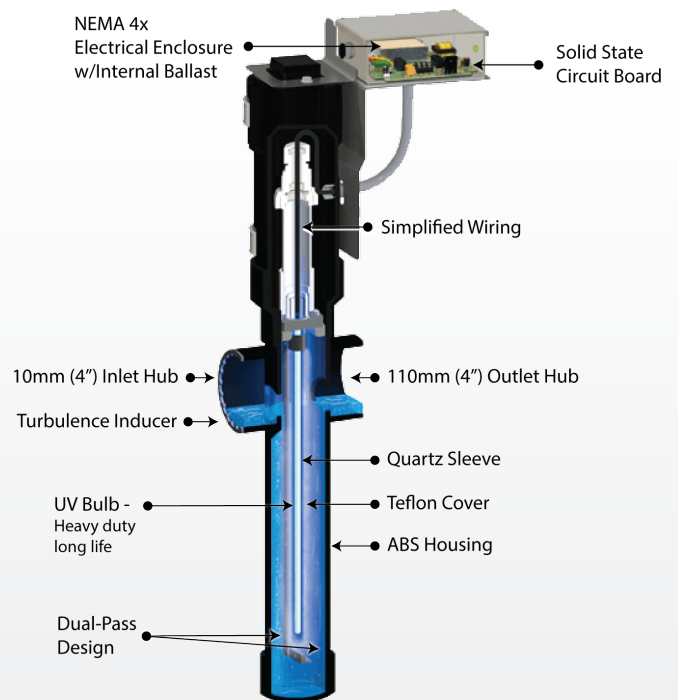

Choose between a Compact UV Filter
or for larger flow rates choose a UV Disinfection Unit

Compact UV Filter
Up to 3000 litres/day (gravity flow only)
Filter Effluent up to 0.4mm

Part no: PL-UV2

UV Disinfection Unit

UV Disinfection Unit
Up to 32,000 litres per day (gravity flow only)
Dual Pass Design

Part no: PL-UV1

Main Benefits:

1. Cost effective solutions
2. No chemical/residual by-products
3. Easy to install and maintain
4. Choose from filtered or non-filtered
5. Made from robust materials
6. Low electrical usage
7. Up to 99.9% reduction of E-Coli
8. Protects surrounding water sources

Typical Applications:

1. Residential & Commercial Wastewater Treatment Plants
2. Residential & Commercial Septic Tanks
