

PL-68 Filter Cartridge

INSTALLATION SHEET

Part no: 30130

Installing a PL-68 filter cartridge could not be simpler if you have a standard 4" T-Piece assembly already installed on an outlet pipe in your septic tank. As long as it is accessible, you can simply push fit the cartridge directly down into the T-Piece assembly and pull out for cleaning and maintenance.

Don't have a T-Piece assembly in place?

No problem, you can purchase the cartridge and housing together directly from Polylok.

Part No: 30130-68H-3
